VOLUME 1

Main top gallard yard 34 feet long  
 14 feet from the middle of the yard  
 the top side the Shive hole Biggest  
 of the yard on the Shive 32 inches Bign  
 of the middle of the Shive hole 16 1/2 in

Luner

I have found by measuring the  
 distance between the Sun & Moon  
 that I am too apt to get the Sun  
 too far on the Moon, which makes  
 the distance to short and by so doing  
 the Luner gives less time than the  
 Chronometer or Greenwich time

School Spearwhaling in the Lat  
 from 3 to 5 Degrees South and Long  
 from 146 to 148 Degrees West, in the mo  
 11th December and January 1855  
 this is from Capt. Rice in the Hellen

C. G. Ingalls passenger on board  
 of the Washington Adleston Capt Wood Boston  
 bound from Hilo to Bedford
