

Fresh Water on board when from the Bay  
 of Sundry 240 bbls  
 Fresh Water started from Oct 2<sup>nd</sup>  
 Oct 11<sup>th</sup> 25 bbls 26-30

Water when we left the Bay of Sundry  
 March 1<sup>st</sup> 1850 240 bbls

Started water 10<sup>th</sup> of April 20 bbls

Water when leaving Sundry 300 bbls

Water started down at Sundry

Water started down at the Bay of Sundry

Water started down at the Bay of Sundry

23 Whales Out and 1200 bbls

I want 12 more and a thin chance

to get it, for whales are very scarce

and will, and a great deal of bad

weather to land by in, and a fine

chance for whales to get fat?

I a chance for them to grow

larger than one we got of

Sundry, did not make a drop

So & S. May 1<sup>st</sup> 1851

of Sundry Island

Saw Whales 82 times on

the voyage
